

MOSQUITOES CAN BREED IN A TEASPOON OF STANDING WATER

GOVERNMENT OF BERMUDA
Ministry of Health and Seniors
Environmental Health

Without standing water, mosquitoes can't breed. Without mosquitoes, there's no Zika, Dengue or other mosquito-borne diseases. Protect your family, friends and community. Tip standing water from containers and get rid of breeding places in your surroundings. For more information please contact **Vector Control 278-5397**
