

## INFLATION RISES SLIGHTLY

Consumers paid 0.9 per cent more in December 2018 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation increased 0.1 percentage point from the 0.8 per cent measured in November 2018.

Between November 2018 and December 2018, the average cost of goods and services in the CPI decreased 0.1 per cent. The all-items index fell to 104.9 in December. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$104.90.

## YEAR-TO-YEAR ANALYSIS

The Health & Personal Care sector was the largest contributor to the year-over-year increase, rising 3.0 per cent. The major driver in this sector continued to be the average cost of health insurance premiums.

The Food sector and the Education, Recreation, Entertainment & Reading sector also contributed to the rise in the annual rate of inflation as price shifts in these sectors were 2.9 per cent and 1.4 percent, respectively.

**Inflation  
Rate  
0.9%**

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

SUMMARY STATISTICS					
Period	Monthly		Period	Quarterly	
	Index	Annual per cent Change		Index	Annual per cent Change
<b>2017</b>			<b>2016</b>		
Dec	104.0	+1.9	Q4	102.3	+1.8
<b>2018</b>			<b>2017</b>		
Jan	103.8	+1.6	Q1	102.3	+2.1

Sept	105.3	+1.1	Q4	105.0	+0.9
Oct	105.2	+1.1			
Nov	105.0	+0.8			
Dec	104.9	+0.9			

**MONTH-TO-MONTH ANALYSIS**

**Food**

Following the 0.1 per cent decrease in November, the Food sector rose 0.3 per cent in December. Price increases were reported in the average cost of green peppers (+15.7 per cent), cantaloupes (+5.5 per cent) and eggs (+1.7 per cent).

**Tobacco & Liquor**

The average cost of cigarettes (+0.8 per cent) and wines (+0.3 per cent), fuelled the 0.3 per cent rise in the Tobacco & Liquor sector.

**Rent**

Following the 0.1 per cent increase in November, the Rent sector was static in December.

**Education, Recreation, Entertainment & Reading**

The average cost of pet food moved up 0.3 per cent, however, the Education, Recreation, Entertainment & Reading sector did not change for the month.

**Health & Personal Care**

Despite the increase in the average cost of medical supplies (+0.3 per cent), the Health & Personal Care sector remained unchanged.

**Clothing & Footwear**

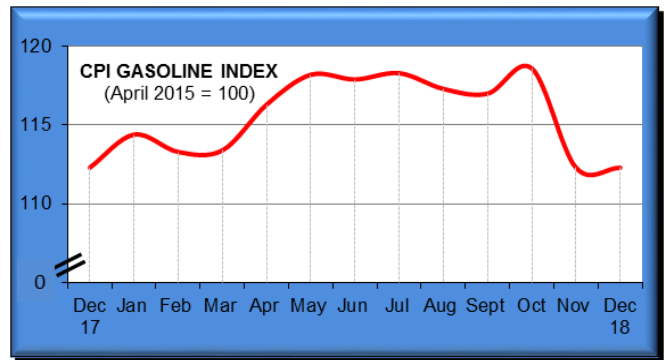

The Clothing & Footwear sector reported no price movement.

**Household Goods, Services & Supplies**

The Household Goods, Services & Supplies sector remain unchanged for December. The average cost of food wraps and trash bags (+0.4 per cent) was offset by the average cost of detergents and bleaches (-0.7 per cent).

**Transport & Foreign Travel**

The Transport & Foreign Travel sector decreased 0.3 per cent. Price decreases were reported in the average cost of overseas hotels (-1.0 per cent) and air fares (-0.6 per cent).

**Fuel & Power**

The Fuel & Power sector dropped 1.8 per cent in December mainly due to the decrease in the fuel adjustment clause (-5.5 per cent).

**COMPUTING PRICE INCREASES**

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website [www.gov.bm](http://www.gov.bm).

**A) Month-to-Month Price Change**

The price change between November and October, 2015 is calculated as follows:

$$= \frac{\text{Nov 15 index} - \text{Oct 15 index}}{\text{Oct 15 index}} \times 100$$

$$= \frac{100.5 - 100.6}{100.6} \times 100$$

$$= -0.1\%$$

**B) Year-to-Year Price Change**

The price change between December 2015 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 15 index} - \text{Dec 14 index}}{\text{Dec 14 index}} \times 100$$

$$= \frac{100.5 - 98.7}{98.7} \times 100$$

$$= 1.8\%$$

**C) Particular Period Price Change**

The price change between April 2014 and January, 2016 is calculated as follows:

$$= \frac{\text{Jan 16 index} - \text{Apr 14 index}}{\text{Apr 14 index}} \times 100$$

$$= \frac{100.3 - 98.3}{98.3} \times 100$$

$$= 2.0\%$$

## WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

## CONCEPTS AND DEFINITIONS

### Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

### Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

### Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

## WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item’s price change compared to the overall change in the sector or CPI.

### Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

### Cost of Living Index

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

### A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2015	2016	2017	2018	Dec 18
<b>Bermuda</b>	1.5	1.5	1.9	1.4	+0.9
<b>United States<sup>1</sup></b>	0.1	1.3	2.1	2.4	+1.9
<b>Canada<sup>2</sup></b>	1.1	1.4	1.6	2.3	+2.0
<b>United Kingdom<sup>3</sup></b>	1.0	1.8	3.6	3.3	+2.7
