

## Quarterly Bulletin of Statistics

### Q1 2010 Highlights

**Air Arrivals:** Bermuda hosted 28,865 tourists

**Tourist Accommodations:** Gross hotel receipts amounted to \$23 million

**Hotel Employment:** The hotel industry employed 140 fewer workers compared to Q1 2009

**Overseas Spending:** Consumers declared overseas purchases of \$13 million

**Retail:** Retail sales reached \$243 million

### Visitors Arrivals and Expenditure:

#### Air Arrivals

Total air visitors for the first quarter of 2010 fell by 3,370 (or 10.5 per cent) to 28,865 when compared to the same period last year. The erratic weather, which caused multiple airline cancellations since the beginning of the year, was partly responsible for the decline in air arrivals during the first quarter. This sector continues to face challenges as Bermuda tries to maintain its share in an increasingly competitive market.

Arrivals from the United States, Bermuda's largest tourist market, declined 11.0 per cent compared to the first quarter of 2009. A total of 19,181 U.S. visitors travelled to the island compared with 21,549 visitors in the same period on 2009. Similarly, fewer air arrivals were recorded from Canada (-13.5 per cent) and the United Kingdom (-0.3 per cent) during the quarter. In addition, air arrivals from all other countries were down, with 316 fewer visitors this quarter.

1st Quarter Air Arrivals

## Cruise Arrivals & Expenditure

There was one cruise ship visit to the Island during the first quarter of 2010 carrying 985 passengers. Total expenditure for these passengers is estimated at \$171,185. In comparison, there were no cruise liner visits to Bermuda ports during the same period in 2009.

## Expenditure by Air Arrivals

Air visitor expenditure rose by a modest 2.1 per cent in the first quarter of 2010. An estimated \$30.3 million was spent by tourists arriving by air during the current quarter, compared to the \$29.7 million reported in the

same quarter of 2009. The average per-visitor expenditure increased by 11.3 per cent to \$1,026 from \$922 a year ago. The largest component of visitor expenditure was accommodation costs which represented nearly 55.5 per cent of all monies spent. In addition, spending on meals and beverages in restaurants accounted for another 24.8 per cent of air visitor outlays.

## Hotel Gross Receipts

Aggregate gross receipts for the hotel industry totalled \$23.2 million in the first quarter of 2010. Hotel industry revenue collected during the first quarter of 2010 was approximately \$4 million below revenue earned during the same period

of 2009. Despite efforts to attract more visitors through discounted airfares from select destinations and resort hotel package deals, total guest receipts declined 15 per cent. Major resort hotels accounted for the bulk of sales revenue with a 90 per cent share of the total, which highlights the fact that more than half of all air arrivals choose to stay at the major resort hotels. Small hotels represented 4.5 per cent of total sales and cottage colonies accounted for 3.3 per cent of the total.

## Hotel Employment

The decline in occupancy levels and hotel revenue negatively affected employment at some commercial

guest properties around the Island. At the end of January 2010, the hotel industry employed 140 less employees in an effort to reduce operational costs. The largest decline in the number of employees was reported by major resort hotels which had 104 fewer workers compared to January 2009. The drop in employment levels was primarily due to the partial closure of one of the Island's larger hotel properties in the fall of 2009. Cottage colonies and housekeeping units, as well as guesthouses and micro-units, also employed 32 and 4 fewer employees, respectively.

Throughout the challenges that the major hotels faced during first quarter they remained the largest employer in the accommodation industry accounting for 81 per cent or 1,864 workers. Cottage colonies and housekeeping units engaged 18 per cent or 418 workers, while guesthouses and micro-units continued to employ less than 1 per cent of the workers in the accommodation industry.

### Overseas Spending by Residents

Residents declared overseas purchases valued at \$13.3 million during the

quarter. This total represents a 4.6 per cent drop in expenditure compared to the same period in 2009. In comparison, domestic retail sales were also down 2.7 per cent during the first quarter of 2010.

Moderate downturns in overseas spending were recorded in most broad commodity groupings during the first quarter. Spending on clothing and footwear fell by \$150,000 from \$6.2 million in 2009, however the sector continued to represent nearly half of total overseas spending. Outlays on household items, furniture and appliances decreased \$25,000, while

expenditures on tapes and compact discs were also down \$119,000 compared to the first quarter in 2009.

Declines in overseas spending were also reported across the other sectors and included fewer purchases of electronic and photographic equipment (-\$142,000), miscellaneous items (-\$37,000), tools machinery and parts (-\$29,000), toys and sporting goods (-\$24,000) and jewellery and watches (-\$8,000).

## Retail Sales

Consumer spending during the first quarter of 2010 declined modestly

compared to the same period of 2009 and the quarterly index of retail sales decreased by 2.7 per cent year-over-year. Gross turnover in the retail sector was estimated at \$242.8 million. This reflects a decrease in sales activity of nearly \$6.5 million compared to the \$249.3 million recorded in the first quarter of 2009. Retail sales for the year started slowly with sales falling 5.5 per cent in January. This decline was followed by a 1.7 per cent sales drop in February and a marginal decrease of 0.8 per cent in March. Overall, all sectors of the index experienced weaker aggregate sales compared

to the previous year's levels, with the exception of food stores and service stations.

There was a marginal fall in sales at apparel stores during the first quarter of 2010 when compared with the same period last year, which translated into a 0.2 per cent decline. Similar sales activity was recorded at motor vehicle dealerships due to weaker consumer demand, with dealers reporting a decline in sales activity of 0.9 per cent during the first quarter. Construction-related sales activity plummeted during the first quarter of 2010 as the demand for building material stores, providers of materials for the construction industry

and residential repairs, declined by 20.2 per cent.

Service stations' sales activity rose during the first quarter of 2010 and this rise marks the first increase since 2008. Average quarterly sales for the service stations sector rebounded with stations reporting an increase of 11.6 per cent. The growth can be partially attributed to a 13.5 per cent spike in gas prices compared to the same period in 2009. In comparison, food store sales increased by 2.4 per cent during the first quarter. The growth in sales at food stores was due mostly to the 2.8 per cent rise in food prices during the quarter.
